

# Avira Antivirus Pro for Android

Security for  
smartphone and tablet

Although **SMARTPHONES AND TABLETS** are small and handy – the problems protecting them can be quite large and significant. Unimaginable what could happen if attackers were to gain control of personal user data via the Internet, not to mention the loss of the device, even being stolen.

Avira offers the newest generation of professional all-round protection to anyone who uses their Android device in a private and business capacity.

Avira Antivirus PRO is available for:

Android 2.2 (Froyo) | Android 2.3.7 (Gingerbread) | Android 4.0 (Ice Cream Sandwich) | Android 4.1 /4.2/4.3 (Jelly Bean) | 4.4 (Kitkat)  
Compatible with HTC, LG, Motorola, Samsung, Sony and Google Nexus smartphones and Tablet PCs with a normal, large and extra-large display

“There are many apps which claim to protect a device. But only very few of them actually achieve what Avira manages ... This app is expressly recommended for security-conscious users.” *Editor's Review, CNET*

Be mobile, yet protected. Features:

- ★ **APP SCANNER**  
Every app installed is automatically examined for viruses and malware
- ★ **ON-DEMAND SCANNER**  
A single click allows you to scan files and archives and then remove any contaminated apps or files detected
- ★ **BROWSE SAFELY**  
Infectious websites are blocked - so there is no way you can be duped by “phishing” or other fraudsters
- ★ **HOURLY UPDATES**  
Mobile devices at risk from the most recent malware? No way – frequent updates ensure that your protection is always up-to-date
- ★ **QUICK SUPPORT ACCESS**  
If there is a problem, the Avira experts are there for you
- ★ **ANTITHEFT SECURITY**  
No one should have access to your passwords, contacts, photos, emails, chats and contents. With a remote click you can fend off any thief by remote locking
- ★ **LOCATION TRACKING**  
The position of your device is shown on a map
- ★ **REMOTE SCREAM**  
This will allow you to find your smartphone if you have mislaid it
- ★ **BLACKLIST**  
Calls and SMS messages from unwanted numbers? No problem – that is what a blacklist is for
- ★ **ONLINE DEVICE MANAGEMENT**  
You can view the security status of up to 5 devices, monitor their battery life and make additional settings

★ Premium: These features are not included in the free version of Avira Antivirus Pro.
